

## DocuWare for Manufacturing

# Streamline production with DMS and AI workflows

Today's manufacturers encounter numerous challenges that impede efficiency and increase operational costs. Manual processes, stacks of paper, and lengthy approvals contribute to wasted time, increased errors, and lack of transparency. For example, unexpected invoices or uncontrolled purchases can severely impact budgets. It's time to change that. With DocuWare, you can digitize paperwork, automate workflows, and reduce manual tasks, ultimately minimizing errors and saving valuable time and resources.

### Overcome Analog Processes

- High administrative workload instead of strategic focus
- Paper-based, manual workflows
- Maverick buying and lack of transparency
- Time-consuming searches for quotes and contracts
- Missed early payment discounts due to delayed approvals

### DocuWare: Rethinking Purchasing

DocuWare's powerful platform optimizes every step of your production and administrative processes:

- Effortlessly capture, process, share and track information
- Centralized document storage
- AI-powered workflows with automatic document classification, structured data extraction and digital approvals
- Intelligent search instead of tedious manual research
- Mobile access to processes and approvals
- Over 500 integrations with existing IT systems, including SAP, Microsoft Dynamics and other ERP/CRM systems

## More efficiency, measurable results

With DocuWare, you can transform your manufacturing processes from the ground up - achieving not just faster workflows but also verifiable cost savings.

### Up to 80% faster order and invoice processing

- Automated workflows and digital approvals dramatically shorten turnaround times from request to final booking.

### Reduce search times by up to 90%

- Instantly find any document with intelligent search and centralized storage.

### Drastically reduce process costs

- Digital workflows slash cost per transaction - for example, from an average of 60 US dollars to just 6-8 US dollars.

### Enhance quality control and compliance

- Standardized, traceable processes minimize risks and guarantee legally compliant documentation - ideal for audits and internal controls.

### More time for strategic tasks

- Automation frees up valuable capacity. Instead of operational tasks, teams can focus on quality and innovation.

”

Once we started using DocuWare in the Accounts Payable Department, we recognized it would be just as effective in other areas of our business and save us just as much time. So, we decided to introduce it to our Manufacturing Department, and that really changed things.

—Andy Derr,  
OPERATIONS MANAGER, M.H. EBY INC.

With DocuWare, your manufacturing business becomes digital, transparent and highly efficient. Enjoy faster processes, lower costs and greater strategic flexibility. See for yourself!
